It's now been 27-months since I was replaced, and I still have to redact things because the assholes who are trying to financially destroy me might try to use what I think against me.

These same assholes think that you are visiting my site, find a cryptic message, and then determine the assholes are actually assholes, and then (again), use what you cypher against them to hurt them. Seriously.

I'm a soon-to-be 62-year-old man who is earning a whopping \$460 on CPP, and yet, with the help of a *blanker (hired hitman)*, they are trying to send me to the streets; making me homeless. I gave 15-years of my life.

Wow. What do you think of people who do things like this to older people?
